CAREER OBJECTIVE

- Second-year Electronics and Communication Engineering student
 - Interested in both software and core electronics domains
 - Strong foundation in Python, basic C, and problem solving
 - Passionate about building practical solutions and working in teams
 - Looking to gain real-world experience through projects and internships
-

SKILLS

- Programming: Python, C (Basic)
 - Development: Basic Frontend (HTML, CSS)
 - Core Skills: Problem Solving, Debugging, Logical Thinking
 - Tools: VS Code, Tinkercad
-

PROJECTS & EXPERIENCE

- **Smart Electricity Optimizer (AI-Based Concept)**

Developed a decision-making prototype to optimize electricity usage using basic AI logic. Presented the concept and gained insight into real-world AI applications.

- **Financial Learning Game for Children (Hackathon Project)**

Collaborated with a team to develop an educational game. Contributed to frontend and backend of mini-games and improved teamwork and development skills.

- **Problem Solving Practice**

Solved 40+ problems on LeetCode using Python, strengthening logical thinking and debugging skills.

EDUCATION

- **B.E Electronics and Communication Engineering (2024–2028)**

Sona College of Technology, Salem

Current CGPA: 8.94

- **HSC (2024)**

Cluny Matric Hr. Sec. School, Salem

Percentage: 89%

- **SSLC (2022)**

Bala Barath Matric Hr. Sec. School, Salem

Percentage: 91%
